

Noelia Perez Marin

Software Engineer

noelia.marin.dev@gmail.com [07895178829](tel:07895178829) Birmingham

Skills

JavaScript

Advanced

JSON, ES6+, DOM manipulation, asynchronous programming, API integration, AJAX

React

Intermediate

component-based architecture, hooks, state management, reusable UI, frontend development

HTML5

Advanced

semantic markup, accessibility, responsive layout, web standards

CSS3

Advanced

responsive design, flexbox, layout systems, UI styling, visual consistency

API integration

Advanced

REST APIs, JSON handling, AJAX, frontend-backend communication, data rendering

StencilJS

Intermediate

web components, reusable widgets, component architecture

Mustache

Intermediate

templating, dynamic rendering, UI components

Behat

Intermediate

BDD, behaviour-driven development, acceptance testing

PHPUnit

Intermediate

unit testing, backend testing, test coverage

PHP

Intermediate

server-side development, business logic, web services

SQL

Intermediate

relational databases, queries, data validation

Git

Advanced

version control, branching, pull requests, code reviews

Docker

Intermediate

containerisation, local environments, development workflow

Languages

Spanish

Native

English

Professional

Summary

Software Engineer with experience delivering production features for real-world products. Background in graphic design, bringing a strong focus on usability, visual consistency, and collaboration with UX. During and after a professional apprenticeship, I have worked primarily with JavaScript, PHP, and React, and have adapted to new tools and languages as required by the product and team.

Experience

Tes Global

Sheffield (Hybrid)

Associate engineer

2023- currently

Software Engineer within the TES Develop product team

- Full-stack development on **TES Develop**, a large-scale education platform built on **Totara (Moodle)** and used by teachers and schools.
- Ownership of an end-to-end feature allowing users to add, edit and delete **external training records**, from planning and UX collaboration to production release.
- Backend development in **PHP**, including Moodle plugins, web services, business logic and secure data handling (GDPR--compliant).
- Frontend development using **JavaScript (AMD modules)-**, **Mustache templates**, HTML and CSS, with a strong focus on usability and visual consistency.
- Design and implementation of **relational database schemas**, SQL queries and data validation.
- Close collaboration with **UX designers, product managers, QA engineers and senior developers** in an **Agile** environment.
- Writing and maintaining automated tests using **Behat (BDD)** and **PHPUnit**, achieving high test coverage.
- Active participation in **code reviews**, refactoring legacy code, debugging complex issues and contributing to CI/CD workflows and staged releases.

Euro Sport

Redditch - UK

Lead Graphic Designer

2022-2023

Led the design of merchandising products for football teams and sports organisations, translating client requirements into production-ready designs.

- Worked directly with sports clubs and clients to understand design requirements
- Designed merchandise and visual assets for football teams and sports organisations
- Managed communication between clients and production teams to ensure accurate delivery
- Oversaw the translation of concepts into physical products, maintaining quality and brand consistency

Freelance Web & Graphic Designer

Granada - Spain

2016-2023

Worked with small businesses and local companies, including Serigran and Seriestilo, to design visual identities and digital experiences such as websites, branding materials, and marketing assets.

- Designed responsive website layouts with a strong focus on usability, accessibility and visual hierarchy
- Created branding systems, typography and visual assets for digital products
- Developed simple design systems and reusable visual guidelines to ensure consistency across digital interfaces
- Collaborated with clients and teams to translate business requirements into clear visual solutions
- Prepared design specifications and visual assets to support web development implementation

Seriestilo

Granada - Spain

Design Lead

2019 - 2022

Led the design and production of merchandising products, working closely with clients and production teams.

- Designed custom merchandising products based on client requirements
- Managed communication between clients and the production workshop to ensure accurate implementation
- Coordinated orders and production timelines across multiple projects
- Ensured visual consistency and quality across product lines

Serigran

Granada - Spain

Graphic Designer

2016 - 2019

Worked as a graphic designer on branding, marketing and digital design projects for local businesses.

- Designed brand identities, logos and visual materials for marketing and advertising
- Created website layouts and simple UI designs using WordPress, marking my first experience working with web interfaces
- Produced visual assets for digital and print, including merchandising and promotional materials
- Collaborated with clients to translate business ideas into clear visual communication

Education

MAKERS

Software engineer Apprenticeship

Birmingham · 2023 - 2024

Intensive, practice-based apprenticeship combining software engineering fundamentals with on-the-job product development. Covered full-stack development principles, object-oriented programming, testing practices (BDD, unit testing), Agile methodologies, and collaborative product delivery in a professional environment.

Sboza2 School of Design

Graphic Design Diploma

Granada - Spain · 2018 - 2020

Focused on visual communication, typography, layout systems, and user-centred design. Developed strong foundations in visual hierarchy, branding, and digital interface design, which now inform my approach to frontend development and UI quality.

Projects

TES Develop – External Training Records Feature

2023

Stack: PHP, JavaScript (AMD), Mustache, SQL, Totara/Moodle

- Designed and implemented a complete Moodle block to manage external training records.
- Built secure forms using the Moodle Form API and later refactored them into a **modal-based UI** aligned with UX designs.
- Developed web services for creating, retrieving and deleting records with AJAX-based interactions.
- Implemented dynamic rendering with **Mustache templates** to ensure reusable, maintainable UI components.
- Handled complex debugging scenarios, including timestamp and timezone issues, through careful backend-frontend alignment.
- Deployed the feature through staging to production following QA validation and stakeholder demos.

Tes Develop × Safeguarding Company – Embedded Courses Widget

2024

Stack: StencilJS, JavaScript, HTML, CSS, APIs, JSON

- Developed a reusable **frontend widget** embedded in an external product to surface relevant safeguarding courses.
- Consumed backend APIs, processed JSON data and rendered dynamic course content (name, description, image, CTA links).
- Focused on **cross-product integration**, enabling users to discover Tes Develop training from another platform.
- Collaborated with Tech Lead, QA, Product Owner and external stakeholders to align technical implementation with business goals.
- Designed the widget to be **scalable and reusable** across multiple Tes applications, following shared design systems.
